

DETAIL A
SCALE 0.150

Length
 $114 + 102.517 = 216.517$
 $216.517 / 2 = 108.259$
 $108.259 - .375 - .375 = 107.509$

Width
 $72 + 60.517 = 132.517$
 $132.517 / 2 = 66.259$
 $66.259 - .375 - .375 = 65.509$

Height
 $65.625 - .375 = 65.25$

Cubic Feet
 $107.509 \times 65.509 \times 65.25 = 459543.15$
 $459543.15 / 1728 = 265.939$ cubic feet

With this design figuring
 in 3/8" wall thickness
 we are acheiving
 266 cubic ft.
